Brief Presentation

JOMATIR - Logistics S.A. started its activity in 1992 in the city of Porto. It was one of the first companies in Portugal to be certified by Standard NP EN ISO 9001: 2015.

Every year it sees renewed its APAT Excellence Certificate, a distinction awarded to companies that fulfill the professional requirements of excellence demanded by the Association of Freight Forwarders of Portugal.

Headquartered in Porto, but with clients and operations all over the world, JOMATIR positions itself as an "External Department" of your company. So that you can devote all your attention to your business, we deal with the transportation of your goods and all legal formalities, operations and associated procedures.

And because we are definitely not just another freight forwarder, we still support our customers in customs and tax matters related to both Export and Import, thus helping to improve the efficiency of their business.

At JOMATIR we work daily to bring you the best solutions for logistics and transportation.

More Than Just A Supplier

Dedicate your full attention to your business, we will deal with the transportation of the goods. With JOMATIR your goods arrive safely to your destination, fulfilling the agreed conditions. In a key area for the success of your business, more than a simple service provider, you find in JOMATIR a partner.

A Tailored Service

A service that begins before your goods leave, presenting you with the best transport solutions at the best prices, accompanying the entire journey from the point of origin to the final destination, helping you with transport insurance, customs clearance, customs clearance, and all bureaucracy inherent in the carriage of goods.

Innovation and Pioneering

Over the years JOMATIR has demonstrated unusual dynamics and pioneering in the offer of new services, without sparing efforts and investments in the research of new markets. We do not invent the wheel, but we seek, with commitment and resilience, to find solutions to problems that are presented to us as seemingly irresolvable.

Customs & Excise Consulting

At a time when the growing globalization of the economy is not compatible with "amateurism" or information deficiencies, JOMATIR launches a new service with the aim of supporting its clients in customs and tax matters related to both Export and Import, thus contributing to the improvement of the efficiency of its business.

Our Mission

To architect global integrated solutions of logistics and transport, with a personalized service of recognized quality.

We aim to:

- Be a trusted partner
- Provide quality services
- Present appropriate solutions to each case
- Practice competitive pricing
- Address problems as challenges
- Innovate in the proposed solutions

Our Values

JOMATIR bases the relationship of trust with its Business Partners and Clients according to the principles of:

- Continuous Improvement
- Competence
- Ethic
- Equity
- Management Efficiency
- Respect for the Environment

Our Vision

We are looking forward to the future of JOMATIR, for which we work daily, as a reference company in the sector.

A company that combines the "knowledge of experience made" with the boldness and dynamism of the new generations.

A technologically advanced company that continues to innovate in the solutions it presents to its customers.

Daniel Pereira (CEO)

"A business value chain is only as strong as its weakest link."

That is why at JOMATIR we always try to surround ourselves with the best. Betting on a capable team, endowing it with the best resources, periodically updating its level of skills with training actions, valuing and rewarding its work creating a true spirit of mission and team, have been our hallmark since forever.

And the JOMATIR team is not restricted to its internal elements.

The partners we work with at different levels and the services we outsource are an integral part of the "JOMATIR Team".

A "handpicked" team to bring the highest level of quality in the services provided to you.

Because what sets us apart is exactly this: the quality of the services provided.

Our premise is that the best elements are the best team. And the best team should be able to find the best solutions and provide the best services, within the highest levels of quality.

And it is because we believe that we have the best team and the best solutions we always give our face, how well everything works and when it does not run sometimes.

That is why, with confidence, we affirm that there are no problems, there are issues to be resolved. And questions always have at least two solutions.

At JOMATIR we work daily to bring you the best logistics and transport solutions.

A photograph of a port at night. Large gantry cranes are illuminated with warm lights, and their structures are reflected in the wet, dark pavement. In the background, a large ship is docked. The sky is a deep blue. The scene is framed by white diagonal lines in the corners. A quote is overlaid in the center, enclosed in large white quotation marks.

At JOMATIR we see problems as challenges or issues to be solved. And each question has at least two solutions.

Sea Freight

For the transport of large, heavy cargoes with significant dimensions, the sea route is usually the best solution. It is also the modality of cargo transportation that presents the best price / quantity ratio.

From any source or destination JOMATIR is your only contact to reserve your cargo, schedule collection and manage all necessary documentation. We maximize your route options and transit time.

Choose one of our flexible sea freight services based on your delivery time, cargo size and equipment needs.

Main Services:

- FCL - Full Container Load)
- LCL - Less than Container Load
- Customs Clearance
- Transport Insurance
- Multimodal Transport
- Door-to-door transport: turnkey

Main Features:

- Reliable transit programs and shipments from major ports around the world;
- Access to space allocation among major carriers;
- Network of consolidation centers and regional access ports to manage cargo flows;
- Electronic Data Interchange (EDI) connectivity with ship operators;
- Door-to-door service;
- Various levels of sea freight services to meet your needs;
- Advanced tracking and reporting options;

Air Freight

Air Transportation is the fastest mode of freight transportation.

According to origin or destination and urgency, JOMATIR plans its transport, coordinates and executes carefully all the complementary services, in the origin and the destination, for any situation that is requested to us.

For goods to arrive at the right place and at a competitive price, it relies on the efficient work of a worldwide network of agents and carriers, efficient communication with customers and a team of trained and experienced professionals.

Main Services:

- Consolidation Service with Global Coverage
- Customs Clearance
- Transport Insurance
- Multimodal Transportat
- Door-to-door transpor: turnkey

Main Features:

- Greater speed;
- Proven efficacy in urgent deliveries;
- Access to markets that are difficult to reach;
- Agility and safety in shifting small volumes;
- Increasing fleet and route increases;
- As IATA Cargo Agents we have all the information regarding flights, companies, routes, space available on the aircraft, freight, etc. ;
- Reduction of storage costs:
- Collection of freight discounts with cargo consolidation;
- Guarantee of basic safety, ethics and operational factors imposed by IATA standards, as well as by international agreements and conventions;
- Allows maintenance of small stock, with daily shipments, in the case of industries that use "just in time" methods, thus reducing the costs of the company's working capital.

Road Transport

JOMATIR in collaboration with its Partners and Agents based in various European Countries, through a network of integrated services with terminals in various parts of Europe, carries any complete or fractional load (Groupage), regardless of its nature, weight, volume or size, from the origin to the destination, always taking into account the factors Time / Quality / Price in its handling and transportation.

Main Services:

- Complete Truck
- Groupage lines
- Express Transport
- Any type of loads
- Door-to-Door Services
- Cargo Insurance
- Customs Formalities

Main Features:

- The most flexible and the most agile in access to cargo, allows the integration of regions, even the most remote, as well as the interior of the countries, especially when there are no other modes of transport available;
- Lower handling of the load, therefore, more safety, since the truck is closed at the place of loading and opened only at the place of delivery;
- Fast delivery of cargo at short distance;
- Transport goes to the load instead of forcing the exporter to take it to it;
- The cargo goes to the importer instead of forcing it to go out;
- Possibility of using simpler and lower cost packaging.
- A fundamental element of multimodality and intermodality.

Multimodal

Multimodal Transportation is one in which it will take more than one type of vehicle to transport the goods to their final destination. Thus trucks, trains, ships, airplanes, or others might be used.

For more complex journeys, or a careful exploration of the quality / price ratio in each section of the transport, the Multimodal option has been considered, often the only one, especially from / to countries that do not confine with the sea.

With the support of our agents we collect your cargo at any point and offer the best solution to the final destination, thanks to a careful selection of partners and suppliers.

JOMATIR has a wide experience in operations of this nature: several routings and the most varied combinations of means of transportation.

Our competence and professionalism, together with our vast experience, ensure that your cargo will undoubtedly be in good hands.

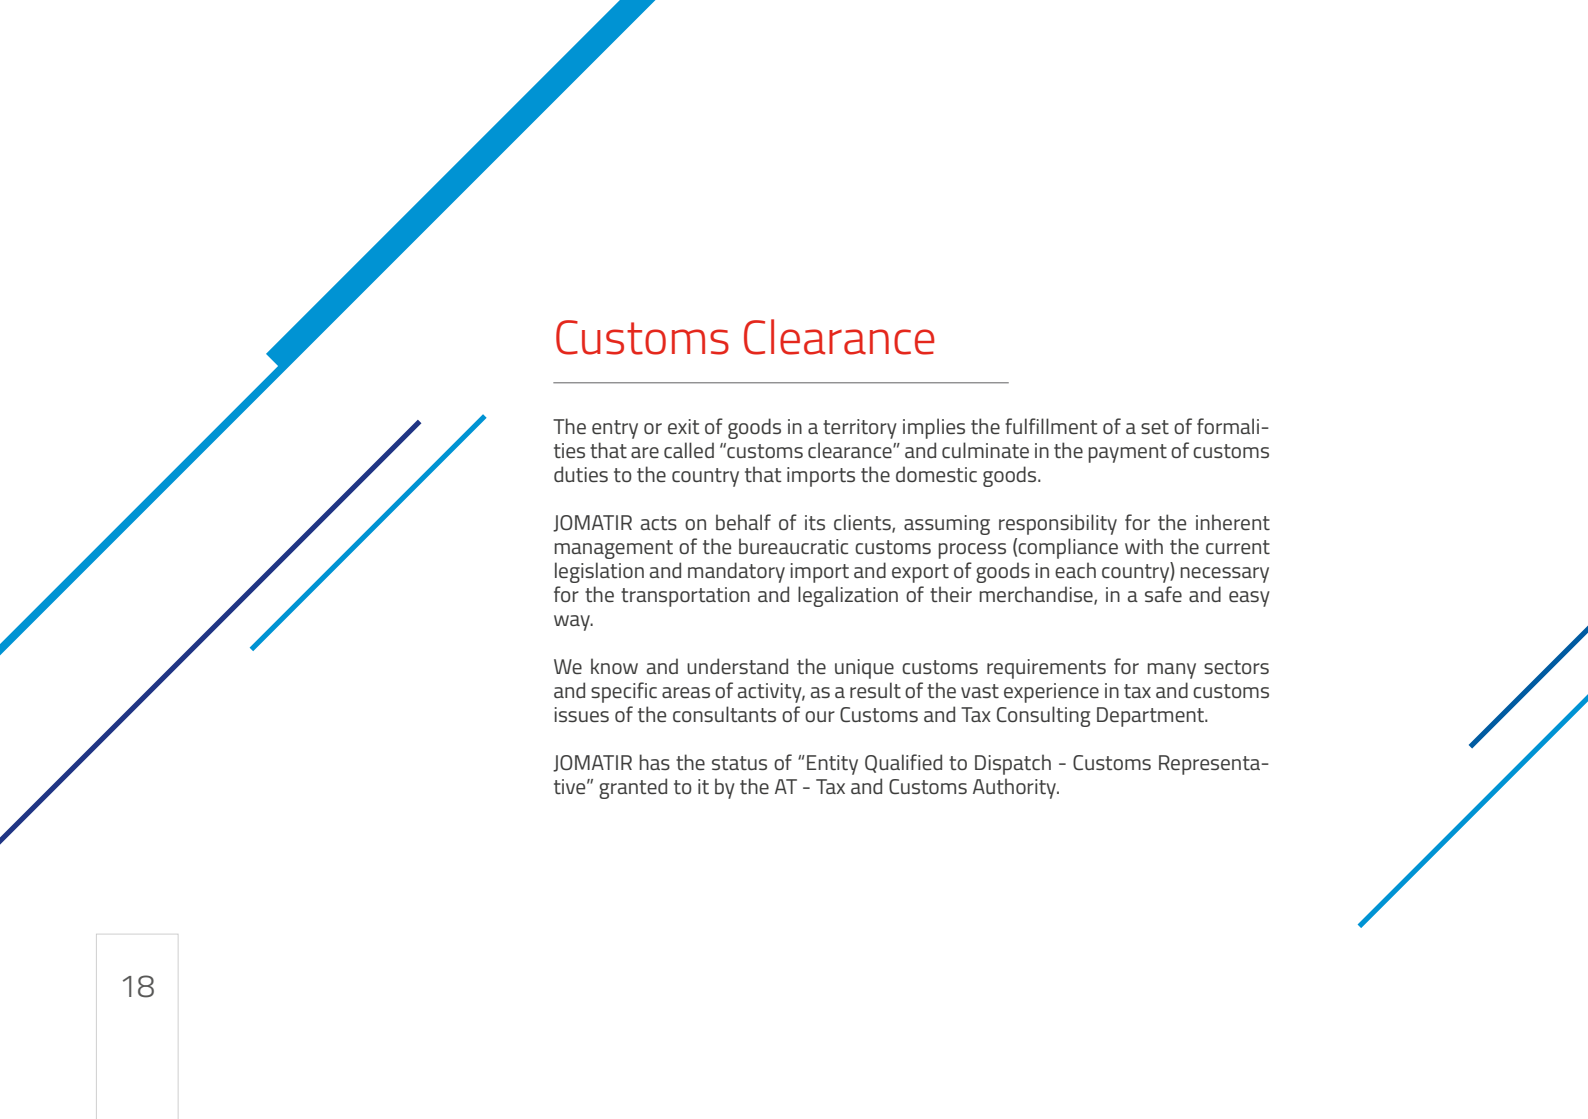

Main Services:

- *Maritime and Road*
- *Maritime and Rail*
- *Air and Road*
- *Air and Sea*

Main Features:

- *More suitable purchase and sale agreements;*
- *Improved utilization of available transport capacity;*
- *Use of more energy-efficient modal combinations;*
- *Improved use of information technologies;*
- *Scale gains and transportation negotiations;*
- *Improved use of infrastructure for support activities, such as storage and handling;*
- *Use of international experience of both transport and bureaucratic and commercial procedures;*
- *Reduction of indirect costs.*

Customs Clearance

The entry or exit of goods in a territory implies the fulfillment of a set of formalities that are called "customs clearance" and culminate in the payment of customs duties to the country that imports the domestic goods.

JOMATIR acts on behalf of its clients, assuming responsibility for the inherent management of the bureaucratic customs process (compliance with the current legislation and mandatory import and export of goods in each country) necessary for the transportation and legalization of their merchandise, in a safe and easy way.

We know and understand the unique customs requirements for many sectors and specific areas of activity, as a result of the vast experience in tax and customs issues of the consultants of our Customs and Tax Consulting Department.

JOMATIR has the status of "Entity Qualified to Dispatch - Customs Representative" granted to it by the AT - Tax and Customs Authority.

At a time when the growing globalization of the economy is not compatible with “amateurism” or information deficiencies, JOMATIR has a service with the aim of supporting its clients in customs and tax matters related to both Export and the Import, thus contributing to the improvement of the efficiency of its business.

JOMATIR's Customs and Tax Consulting service is headed by Dr. Pinto Ribeiro, former Director of Customs of Aveiro.

JOMATIR customers benefit from the support of this service without any additional costs. If you are our customer contact us and we will clarify your doubts and questions.

I would like to benefit from this consulting service, but do not you consider becoming a JOMATIR customer? Contact us at caf@jomatir.pt.

We answer your main doubts and questions

- *What duties do the Export Company's goods pay in the importing country?*
- *What procedures and formalities are in place for the clearance of your goods, rules of origin, etc.?*
- *What is the tariff classification of imported goods, final products and raw materials?*
- *What is the relationship between the tariff regime and the origin of the goods?*
- *Customs value. What is the tax base for the calculation of duties and VAT?*
- *What destination will you give to your imported goods?*
- *The different customs and tax implications.*
